Room for 10-year-old Rohan Arora in New Delhi

The space is modern and youthful in its treatment. We selected blue as the dominating colour in the room. As Rohan often invites friends and cousins for sleepovers, we opted for two separate single beds instead of one double bed.

Being a boy's room, the space has a robust character. A semi-circular element, clad with maple veneer and supported by tension wire, forms an interesting ceiling over the bed. The blue furnishings coordinate well with the blue accent wall.

The study area of the room is visually separated with a different feature on the ceiling. Here multiple elliptical cut-outs in the ceiling are painted in magenta colour and then highlighted by diffused light, lending the room a soft glow. A storage space is provided above the study table in smart and reachable cabinets.
